The homeowners, who have water features throughout their house, wanted a large saltwater aquarium to be incorporated into their remodeled kitchen. Deco Design Studio LLC went even further by integrating a stream on the granite countertop that circulates distilled water, humidifies the room, and serves as a great conversation piece.

It was the job of Deco Design Studio LLC to keep the openness of the main floor, while providing a functional and aesthetically pleasing kitchen in this Lindal Cedar Homes residence. An 8' stainless steel hood and multi-level island act as a separation between living area and cooking space. Stainless steel and cherry cabinets work in harmony with the rest of the home's varied wood finishes.
